- **Interests:** Continuous improvement, learning new technologies

PROJECTS

Tic Tac Toe Unlimited

In a small game where there is no draw, you play up to 6 moves. After that, the first move starts to disappear.

Technologies used:
Vue.js, Tailwind, and Typescript.

In this project, I:

- Added the ability to play in two modes: PVP and PVC.
- Implemented the Minimax algorithm for PVC.
- Implemented a random number generator (RNG) feature that increased game replayability and user engagement.

WORK EXPERIENCE

Little miss style • turkey

01/2023 - 01/2024

Full Stack Developer • Part-time

- Successfully developed and launched a fully functional e-commerce website, enhancing user engagement and sales utilizing Next.js, Wix API, and Tailwind CSS.
- Achieved a 99% front-end performance on the desktop within 6 months by optimizing code and enhancing web technologies for faster load times.
- Enhanced website functionality by 30% through backend code optimization within 3 months, significantly improving user experience and application stability.

EDUCATION

Associate's degree in Computer Programming

Anadolu University
